Subject: Intimation under Regulation 30 of SEBI Listing Regulations, 2015 - Investors Presentation.

Dear Sir/Ma'am,

We are pleased to enclose herewith the Investor Presentation. The same will also be made available on the Company's website at <https://hirect.com/intimation/>.

The enclosed presentation will be used during the Earnings Conference Call with Analysts and Investors.

Kindly acknowledge receipt and take the same on record.

Thanking you,

For Hind Rectifiers Limited

Anil Nemani

Chief Financial Officer

*This presentation and the accompanying slides (the “Presentation”), which have been prepared by **Hind Rectifiers Limited (the “Company”)**, have been prepared solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment whatsoever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company.*

This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain forward-looking the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.

This presentation contains certain forward-looking statements concerning the Company’s future business prospects and business profitability, which are subject to forward-looking risks and uncertainties and the actual results could materially differ from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in earnings, our ability to manage growth, competition (both domestic and international), economic growth in India and abroad, ability to attract and retain highly skilled professionals, time and cost over runs on contracts, our ability to manage our international operations, government policies and actions regulations, interest and other fiscal costs generally prevailing in the economy. The Company does not undertake to make any announcement in case any of these forward-looking statements become materially incorrect in future or update any forward-looking statements made from time to time by or on behalf of the Company.

Q3 & 9M FY26 Financial Highlights

Mr. Suramya Nevatia
Chairman & Managing Director

Commenting on the performance Suramya Nevatia, Chairman & Managing Director of Hind Rectifiers Limited said,

"We are pleased to report strong operational and financial performance during Q3FY26, driven by sustained demand across the railways and Industrial segment.

Strong Financial Performance: Consolidated Revenue for the quarter grew **64.2%** year-on-year to **Rs. 277.4 crore, marking the highest-ever quarterly revenue**, driven by robust growth in traction transformers and power electronics supplies to Indian Railways. Consolidated Operating EBITDA increased **44.9%** year-on-year to **Rs. 25.5 crore**, driven by sustained execution. This translated into improved profitability, with consolidated PBT before Exceptional Items rising **23.3%** year-on-year to **Rs. 16.6 crore**. Further, the Board of Directors has approved the issuance of bonus shares in the ratio of 1:1, reflecting the Company's strong financial position and its commitment to reward shareholders while improving the liquidity of the Company's equity shares.

Robust Order Book: Our order book remains high at **Rs. 1,013.0 crore**, supported by Indian Railways' continued focus on electrification and network expansion, along with steady demand from the industrial segment.

Backward Integration Project: During the quarter, we commenced the use of a certain quantity of in-house manufactured copper conductors in transformers supplied to Indian Railways. Currently, we are ramping up the capacity and expect to improve the cost efficiency and supply reliability, while also exploring external market opportunities for these copper conductors from Q1FY27 onwards. Overall, this initiative enhances control over critical inputs, improves lead times and helps mitigate execution delays and penalties.

Strengthening leadership: During the quarter, we further strengthened our leadership team with the appointment of Mr. Douglas J. Bailey as Global Chief Executive Officer of the company and its Subsidiaries.

Global Expansion Strategy: On the global expansion strategy, integration efforts with BeLink Solutions is progressing as planned and we are actively focus on strengthening existing customers relations and evaluating new opportunities for the printed electronics in Railway and defence sectors across European Markets.

Looking ahead, industry tailwinds remain favourable. Continued government emphasis on railway electrification, rolling stock modernisation, power infrastructure development, defence indigenisation, and domestic electronics manufacturing, as reiterated in the Union Budget, provides strong structural support for our core businesses. Backed by a robust order book, disciplined execution, and ongoing strategic initiatives, we remain confident of delivering sustainable growth and long-term value creation."

Driving Success Through a Growing Order Book (INR Cr)

Order Book Mix & Revenue Mix

Product wise Revenue Mix – 9M FY26

Product wise Order Book Mix – 9M FY26

Orders Wins in 9M FY26

- ❖ Robust Order Book backlog stood at **INR 1,013.0 crore as of December 2025**
- ❖ Won **INR 127 crore supply order for electrical components and equipment from Indian Railways**, to be executed by FY 2026-27
- ❖ Additional order of **INR 101 crore from Indian Railways**, with execution spread between financial years **2025-26 and 2026-27**
- ❖ These orders highlight Hind Rectifiers' pivotal role in enhancing India's railway infrastructure and power electronics industry
- ❖ The growing order book reflects the company's competitive edge and solid market positioning

Hind Rectifiers Limited

Strategic Updates

Hirect acquires BeLink Solutions to Build European Hub for Robotics, Power Electronics & EMS

Hind Rectifiers Limited

Hind Rectifiers Limited, through its subsidiary 'BELINK HIRECT SAS', has acquired the business and operating assets of 'BeLink Solutions', a France-based Robotics, EMS and Electronics R&D company with 38 years of experience in the electronics industry. This acquisition strengthens its position in the global Robotics and EMS markets

Enhances Technology & R&D Capability

- Leverages BeLink solution's proven expertise in **Robotics, EMS, and Power Electronics R&D, together with Hirect's domain strengths**, to accelerate innovation and develop **next-generation technologies**

Access to world-class infrastructure

- Offers **six fully automated production lines**
- **Advanced testing equipment**
- Enables Hirect to meet the evolving demands of its customers

Key Rationale

European base for EMS, Robotics and Power Electronics manufacturing

- Provides Hirect **with a strategic manufacturing base in Europe, enhancing its global manufacturing capabilities**

Unlocks significant asset value at an attractive entry price

- The transaction brings under Hirect's ownership a **state-of-the-art Production and Testing infrastructure**
- Additionally, the acquisition includes all the **Plant & Machinery, intellectual property, technology, customer contracts, and purchase orders**

Strengthening Core Capabilities through Backward Integration in Copper Conductors

Hind Rectifiers Limited

Strengthening Backward Integration Capability through in house production of highly specialised Copper Conductors for the Transformer Industry

Continuously Transposed Conductors

Enamelled Paper Insulated Copper Conductors

Paper Insulated Copper Conductors

Key Benefits

- Creates a new vertical with specialised, fast-moving copper conductor products that have tremendous export potential
- Enhances operational efficiency by streamlining the supply chain, ensuring steady availability of critical raw materials, and reducing dependence on external vendors
- Positions the Company to meet the growing demand from both its own traction transformer requirements and the wider transformer industry
- Drives cost optimization and margin improvement, strengthening long-term sustainability and competitiveness

Capex: Rs.56 crore (funded through internal accruals and term loans)

Facility: Integrated copper conductor manufacturing line at Sinnar Plant

Market Impact: Creates a new vertical with significant export potential

Hind Rectifiers Limited

Company Overview

Leader in Design & Development of Electrical & Electronic Equipment

Hind Rectifiers Limited

Precision engineering leader driving India's rail electrification and modernization, designing and delivering mission-critical

State of Art Manufacturing facility at Sinnar and Satpur, Maharashtra and R&D center in Mumbai & Hyderabad, focused on designing and developing new products

Advanced technologies with automated testing and efficient operations driven by the *Theory of Constraints Methodology*

A network of more than 500 Clients; Exports to more than 30 Countries

Manufacturers of Highly specialized and intricately engineered products

Hind Rectifiers Limited

Strategic Roadmap & Way Forward

Growth to be Assisted by Strong Industry Tailwinds

Hind Rectifiers Limited

Locomotive demands

Demand for total No of Loco Motives*

Demand for total No of MEMUs*

Indian Railway Sector: Key Highlights

Infrastructure Investments

- The Union Budget 2026 allocated a record INR 2,93,030 crore to the Ministry of Railways
- The funding is targeted at new lines, gauge conversion, doubling, traffic facilities, rolling stock, and the KAVACH railway safety system

Electrification & Sustainability

- Electrification drives India's Scope 1 Net Zero by 2025 and Scope 2 Net Zero by 2030
- FY25 saw 1,400 locomotives produced, 200,000 new wagons added, and 17,000 non-AC coaches.

Technological Advancements

- Adoption of regenerative braking, energy-efficient HVAC, and power converters enhances efficiency
- Electrification and semi-high-speed upgrades create demand for advanced trainsets and automated monitoring

Electrical Equipment Market Growth

- India's electrical equipment market valued at USD 89.9 billion, driven by automation, infrastructure, and energy efficiency
- Hindrect operates in a niche segment, benefiting from railway modernization and electrification demand

High-Speed Rail Push

- Union Budget 2026 has focused on the development of seven high-speed rail corridors in the country.
- Freight loading reached 1,179 million tons; IR ranks among top three global freight movers

Favorable Industry Tailwinds

- Annual Capex Investments of ~35Billion USD by Indian Railways and Metros with growth forecast of >8% YoY
- GoI's focus on growth of manufacturing sector, specifically electronics & electrical products.

Strong Capabilities for Order Book Execution

- Hind Rectifiers' state-of-the-art manufacturing setup ensure precise, scalable, and timely execution of diverse orders
- Leverages decades of expertise and technological capability in electrical and electronic equipment.

Quality in-house R&D team

- Setting up of global offices and sales network will enable to tap export markets.
- HVAC Systems are applicable in railway, metro and construction and commercial vehicles.

Catering New Industries and Markets through Diversification

- Young team of more than 100 engineers in electrical, electronics, controls, mechanical, and software engineers.
- Strong product life cycle development from simulation to optimized maintenance.

Strengthening Manufacturing Capacity

- Expanding Sinnar and Satpur facilities to add new product lines.
- Leveraging automation and optimized layouts to enhance throughput
- Driving backward integration to improve cost efficiency, quality control, and supply chain reliability.

Product Innovation and Development

- Investing in advanced propulsion systems and related technologies for the evolving railway sector
- Strengthening R&D and engineering capabilities to drive innovation in power electronics.

Growth via New Clients and Geographies

- Strengthening partnerships with Indian Railways and expanding ties with private rolling stock manufacturers
- Pursuing geographical diversification with a focus on Europe and South America, the acquisition of BeLink Solutions strengthens the Company's position in the global Robotics and EMS markets

Focus on Overall Growth & Margins

- Aligning expansion strategy with India's infrastructure and industrial modernization initiatives.
- Capitalizing on government-led projects to drive accelerated growth.

Advancing Technology Through Research & Development

Hind Rectifiers Limited

Railway Propulsion and Traction Solutions

- Hind Rectifiers is enhancing its product portfolio with high power traction solutions for locomotives and EMUs
- These cutting-edge developments improve performance, reinforcing its position as a leader in railway and transportation technology

Market-Driven Development Approach

- By aligning R&D efforts with industry needs, Hind Rectifiers accelerates time-to-market while optimizing costs
- A responsive development strategy ensures adaptability, precision, and sustained growth.

Collaborative Innovation Through Partnerships

- Strategic alliances with industry leaders and research institutions drive technological progress while mitigating development risks
- These partnerships expand expertise in power electronics, signaling, and automation, fostering cutting-edge advancements

Sustainability-Focused Engineering

- With a commitment to energy efficient and environmentally responsible product development, Hind Rectifiers is creating solutions that align with global sustainability goals
- This approach opens doors to new markets and caters to the increasing demand for ecoconscious technologies

Continuous Improvement & Product Evolution

- By integrating real-world insights into its development cycle, the Company ensures continuous enhancements in performance, durability, and operational efficiency
- A focus on iterative refinement leads to better customer satisfaction and long-term reliability
